

Guillermo Diéguez

Head of frontend at Exa Labs · Remote from Argentina, UTC-3

dev@guillermodieguez.com github.com/dieguezguille linkedin.com/in/dieguezguille guillermodieguez.com

Software developer with 7 years of experience in fintech, web3, SaaS and games. Since 2024 I have been building the Exa App, a self-custodial wallet with a Visa card, in React Native, Expo and TypeScript, and since June 2026 I have led its frontend team.

Experience

Head of frontend, Exa Labs [Case study](#) Jun 2026 - Present

Senior frontend developer Jul 2024 - Jun 2026

- Ship the Expo app to iOS, Android and the web: over 100 mobile releases since November 2024.
- Built the app side of the Base launch, and swaps and sends across networks through LI.FI.
- Set up localization in English, Spanish and Portuguese.
- Extended the Maestro end-to-end tests for payment flows and traced release blockers to their root cause, including bugs in third-party libraries, some of which I reported upstream.

Senior React developer, TheStartup.com Nov 2022 - Jul 2024

- Built CMS-style content features and improved multi-tenancy in a SaaS for entrepreneurship programs. Part of the small team that took the company through funding rounds totaling over 1M USD.
- Led technical interviews for senior React roles.

Senior frontend engineer, Rather Labs Apr 2022 - Aug 2022

- Built dApps for crypto trading and lending, and a cross-platform Electron app that encrypts customers' API keys for fiat and crypto payments.
- Integrated traditional banking APIs and led an R&D squad building proofs of concept.

Software developer, OneBitTech [Case study](#) Oct 2020 - Dec 2021

- Owned the Unity and C# frontend of casino games played by thousands, for its studio Ruvibet, working closely with its backend and UI/UX teams.
- Created the training program for new team members and introduced unit testing, pair and mob programming.

Software developer, from trainee to junior, Siltium Apr 2019 - Oct 2020

- Built augmented reality experiences with Unity and Vuforia, 3D web apps with react-three-fiber, Xamarin apps and .NET Core APIs.

Freelance work

Sole developer, Supra Argentina [Case study](#) Mar 2026 - Present

- Build a construction company's inventory system, in development, that records movements where they happen.
- Map each flow with the people at Supra and validate the diagrams with them before building it.

Capabilities

Apps	TypeScript, React, React Native, Expo, Next.js
Backend	Hono, Postgres, Drizzle, Supabase, Better Auth
Web3	wagmi, viem, Alchemy Account Kit, LI.FI, ethers
Tooling	EAS, Maestro, Claude Code, Sentry, Nx

Contributions

[exactly/exa](#) (core contributor, since 2024) · [tamagui/tamagui](#) (6 contributions, 2026) · [kristerkari/react-native-svg-transformer](#) (pull request, merged, 2026)
